

Telequip

Count On Us

Telequip® introduces
the newest member of the
Transact™ family of coin dispensers

T-Flex™

Improves profits by:

- 🔹 Increasing thru-put at checkout
- 🔹 Reducing cashier errors and shrink
- 🔹 Improving staff productivity

Serial & USB Capability

Quick-Service Restaurants • Supermarkets • Convenience Stores • Gaming
Drug Stores • Cafeterias • Banks • Self-Service Kiosks

T-Flex: Added Versatility to Improve Customer Service

Providing quality customer service is essential to your success. Offering an outstanding product combined with customer service that is responsive, reliable and professional makes for a winning combination. Telequip's Transact family of coin dispensers, and our newest product, the T-Flex coin dispenser, are an integral part of a quality customer service solution.

Tangible Benefits

Simple to install and easy to train employees, studies have shown that installing a coin dispenser can shave between 5 to 7 seconds off of every cash transaction. This means you'll get more customers through the line faster. More customers equal increased profits!

With a T-Flex coin dispenser, cashier errors become a thing of the past because the dispenser automatically calculates the correct change through your point-of-sale system. Transactions become fast, dependable and accurate.

T-Flex Features:

- USB interface frees up serial ports for additional peripherals
- e-lock time-saving feature allows users to lock and remove canister without a key*
- Sleek design and custom color options* integrate seamlessly into your current business environment
- Plug and play, pre-wired installation
- Durable construction withstands continuous high-volume operations in the most demanding environments
- High-capacity coin canister holds approximately 200 transactions
- Adaptable to a variety of currencies including the United States, US Dollar, Canada, United Kingdom, Euro and many more
- Spare I/O and power capability for future functionality*
- Firmware upgrades easily made with in-system programming

Serial and USB Capability in One Unit

Telequip's standard T-Flex coin dispenser boasts both RS232 serial port and USB interfaces. If you currently have serial connectivity but are considering moving towards a USB connection in the future, you can have both without the additional cost.

Dispense Options

- Built-in ability to accumulate coin dispense history
- Even depletion provides optimal coin use for long runs
- Minimum dispense
- Low coin by column*

In-Lane Canister Loading

With T-Flex's Load-In-Lane canister feature, users can easily drop coins through the top of the canister cover. You can securely rest the canister on the outer enclosure without taking up additional counter space.

T-Flex Specifications

Size: 9 3/4" W x 6 1/2" x 14 1/2" with canister
9 3/4" W x 6 1/2" x 7 3/4" without canister
